About This Game

Rise up, Conjuror, for the fate of Eldinoor rests in your hands! The great wyrm Arnathra has awakened from her centuries-long slumber, and great is her hunger for blood and gold. Ever a covetous and wrathful beast, Arnathra has enslaved the orcs of the Aedrech Mountains and sends them into our lands. Even now they pour forth into the Valley of Crows, a frenzied horde intent on bloodshed and plunder. Hold them here, at the Pass of Sorrows, and call forth your towers of fire and ice. Let neither your courage fail, nor your wand rest idle, for without you... all is lost."

Orc Towers VR is a first person tower defense game. Build your defenses up to defend against the orc hordes. Teleport between towers to unleash different spells and combinations to defeat the orcs.

- Several surround sounds were added.

Optimization

- I edited and optimized all the software files except artificial intelligence.Because artificial intelligence software is a very large file, I will fix it in future updates.
- The entrance scene of the game was deleted because it caused a lot of problems in the opening of the game.

Graphics

- The graphics quality was improved in a software.
- Very long and effective studies have been done on the light.
- Reflection settings were made.
- Some texture map updates were made.

-
- A new water model was added.

 - Tessellation technology was added.

AI

- Artificial intelligence is a little more intelligent.
- Passing through character has been fixed.

. Alpha 13.9 - Craftable Paintings:

Today's update includes the new craftable paintings! There are 10 paintings in total. Five of the paintings will *only* available to Early Access players.

Paintings a require a painting frame, a painting canvas, and an alchemy ingredient. Frames are crafted by Carpenters and canvases and the paintings themselves are crafted at the Tailor.

This update also includes some fixes:

- Masterwork armor can always be used to craft decorative armor sets.
- You should no longer see blue orbs on your radar map. These were used when I was testing the falling leaves system.
- Falling leaves now correctly disappear when a tree is chopped down.
- The falling leaf system will no longer place falling leaves on trees that aren't fully grown.

-
- Fixed a bug with Ram Helm Decorative Armor that caused the icon to fail to display in your inventory.
 - Fixed a bug that caused the Grrumble Quest to fail to start.
 - The Stonemasons will no longer lose Shopkeeper status after loading a save.
 - Optimized the system that creates the crafting list when you speak to a shopkeeper.
 - Removed the glare from the 3D crafting view.

I'm also working on the new Story Quests and the new combat system. Hoping to have the story quests complete this week.
